WIDE RANGE

The extensive *Minéral Color* range of flakes enables you to create an infinite number of colour combinations and offer colour schemes that co-ordinate with a wide variety of interior designs.

CUSTOM-MADE COLOURS

Minéral Color can design any specific flakes on request as well make up colour combinations to your own specification.

COMPETITIVE EDGE

To anticipate customer expectations, *Minéral Color* has developed 6 flakes sizes (00, 1 mm, 2 mm, 3 mm, 5 mm and 15 mm) these new sizes help you respond to the new requirements of a fast-growing market.

MINERAL COLOR

Mineral Color is a french manufacturer of decorative flakes. It's new range includes 150 monochrome colours and 30 Berlingots (flakes with 2 colors).

PRODUCTS

The flakes, principally used in decoration for wall and floor applications, are made of acrylic, wich makes them highly fade-resistant.

RAPID SUPPLY

Rapid supply is guaranteed by Minéral Color's large warehouse that stocks significant quantities of all its standard monochrome flakes.

The whole range is packaged in plastic bags and despatched in 20 kilo cardboard box.

Malgré le soin apporté à la réalisation de notre palette, l'effet peut être légèrement modifié.

The background of the advertisement is a vibrant, multi-colored surface, possibly a floor or wall, composed of small, irregular particles in shades of red, orange, yellow, green, and blue. In the center, a large, semi-transparent globe with a black grid pattern is overlaid. The words "MINERAL COLOR" are written across the globe in a bold, black, sans-serif font. To the left of the globe, there are several small, white, paper-like bags, each filled with a different colored powder. To the right, a wooden tray is divided into several compartments, each containing a different colored powder. The overall composition is dynamic and colorful, emphasizing the variety of pigments offered.
